

Puget Sound TRT
Nineteenth meeting—Tuesday, October 9, 2001
Northwest Fisheries Science Center, Seattle, WA
DRAFT Agenda

Tuesday, October 9 (NWFSC Rm 438E)

- | | |
|-----------------------|---|
| 9:00 | Population viability issues, implications of planning ranges (All) <ul style="list-style-type: none">*New results from VRAP*Equilibrium abundance vs. escapement numbers, recruits, what are we asking people to count, anyway?—how to express population viability criteria, implications for harvest, other H's.*Develop clear description of why not all populations can be at lower end of planning ranges for ESU to be viable/delisted/recovered.*Estimates of juvenile/freshwater productivity—how to use HPVA results and MEA?*Additional technical analyses the TRT needs to do before “finalizing” release of planning ranges (e.g., further work on s^2, making PVA results more population-specific, etc.)*schedule for chinook, Hood canal summer chum analyses |
| noon | LUNCH |
| 12:30 | ESU-level issues |
| 1:00
(All) | Prioritizing next steps for habitat, diversity and spatial structure |
| 3:00 | Debriefing from Shared Strategy retreat, next steps (Jim K. et al.) |
| 5:00 | ADJOURN |
